**REQUEST FOR CERTIFICATE OF CORRECTION  
PURSUANT TO 37 C.F.R. § 1.322**

Certificate of Correction Branch  
Commissioner for Patents  
Post Office Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

Transmitted herewith is a Certificate of Correction for United States Patent 7,752,322 issued July 6, 2010. Upon reviewing the patent, the following error was noted and should be corrected as follows:

In the CLAIMS:

Claim 18, column 7, line 16, after "cookie" insert --,-- (comma).

The Certificate of Correction sets forth these corrections.

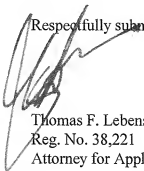

**Remarks**

A review of these documents confirms that the error was made in the printing of the patent. Please see Exhibit "A", claim 10, line 13, from page 4 of the Supplemental Response to Office Action dated June 8, 2009, filed with the United States Patent and Trademark Office October 27, 2009.

Since this error for which a Certificate of Correction is requested was a result of the United States Patent and Trademark Office mistake, no fee is due (35 U.S.C. § 254). Please charge any deficiency or overpayment in fees to Deposit Account 06-1135.

Dated: 8/20/2010

Respectfully submitted,

Thomas F. Lebens

wherein each server of the plurality of other servers provides a particular service  
25 available to the user of the customer device,

wherein the user is prohibited from accessing the service if the unique customer  
identification received by the at least one server does not match the unique customer  
identification stored on the at least one server, and

whereby a ubiquitous presence on a network is provided for facilitating provision of a  
30 service to the user.

10. (currently amended) A computer-readable medium, comprising:  
a computer program adapted to:

run a client application, wherein the client application is not a web browser, and  
wherein the client application runs on a customer device incapable of managing a cookie;

5 receive user information entered into the customer device;

communicate the entered user information to a first server;

store the user information on the first server;

create a unique customer identification for a user of the customer device;

store the unique customer identification on the first server;

10 communicate the unique customer identification to ~~a client~~ the customer device  
running the client application and to a plurality of other servers running a plurality of  
server applications, whereby a unique customer identification communication, lacking a  
cookie, is provided, wherein the communication ~~does not include a cookie~~ is sent to a  
browser the customer device and to the plurality of other servers;

15 store the unique customer identification on the ~~client~~ customer device and the  
plurality of other servers;

communicate the unique customer identification from the client to at least one  
server selected from a group consisting essentially of the first server and one other  
server of the plurality of other servers; and

20 authenticate the user by matching the unique customer identification received  
by the at least one server with the unique customer identification stored on the at least  
one server ~~or one of the other servers~~,

wherein each server of the plurality of other servers provides a particular service
